SAMMONS PRESTON ADJUSTABLE WIRE FRAME CERVICAL COLLAR

This cervical collar will assist with reducing the motion of the head and neck and provide support for each. Featuring an open design, it has a workable wire frame which allows the wearer to adjust the feeling and fit of it easily. The padding on the frame gives the wearer comfort and is removable and washable. Sizing based on neck circumference.

Key Features:

- Indications for use: Neck strains, sprains, whiplash, and mild cervical support
- Restricts motion while supporting your head and neck
- Open design is cool and unobtrusive
- Not intended for conditions that need cervical immobilization
