TheraBand Rocker and Wobble Boards are designed to build core strength and improve balance. These stability trainers are made with black molded plastic and a specially-designed ridged surface on the top to increase balance perception. The anti-skid surface on the bottom of the Wobble and Rocker Boards provides greater safety to ensure the board doesn't slip during exercise. The Rocker Board is designed with two parallel bars for forward and backward or side to side balance training, while the Wobble Board is designed with one rounded bottom surface for 360° balance.

- 081091115** Rocker Board  
**081084441** Wobble Board

## TheraBand Soft Weight

TheraBand Soft Weights are a great alternative to traditional dumbbells or other weighted workout balls. These balls vary in weight while maintaining the same 4.5" diameter to ensure grip is not inhibited during progression. The soft, easy to grip shell makes isometric workouts and other physical therapy exercise simple and fun.

- 081247436** Assorted 1 ea. of TheraBand Tan, Yellow, Red, Green, Blue, and Black

## THE RIGHT STRETCH. EVERY TIME.

TheraBand™ Kinesiology Tape eliminates misapplication – even for beginners – with our exclusive XactStretch™ Technology. Our unique stretch guide indicators allow users to get the right stretch, every time.

Take the guesswork out of tape application.

Small  
Indicator

Large  
Indicator

TheraBand Kinesiology Tape is 0% tension off paper. Simply stretch the small hexagon shape to form an equilateral hexagon which represents 25% stretch. Stretch the large hexagon shape to form an equilateral hexagon – represents 50% stretch. Fully stretched, TheraBand Kinesiology Tape reaches 100% of its off paper length.

It's that simple to be sure you have the right stretch, every time!

## Jamar Smart Hand Dynamometer

The Jamar Smart works seamlessly and wirelessly with a mobile app. Download the free Jamar Smart app from the Apple App Store, and you'll be able to control your Jamar Smart from your iPad tablet. The app is designed to expedite and enhance patient evaluations allowing results to be quickly repeated, edited, and saved.

The Jamar Smart replaced the hydraulic system found in other dynamometers with a circuit board and electronic load sensors. This technological advancement gives you a more accurate tool to measure hand strength in clients with hand trauma and dysfunction. We also increased the durability of the dynamometer by eliminating all internal moving parts, and encasing the electronics in a sturdy aluminum body with a scratch-resistant UV coating. The readout displays isometric grip force from 0-200 lbs (90 kg).
